Jess et all,

Attached to this email is the revised WVMSGP that was provided to Liz via email on Friday. I have included two emails that provide the foundation of the last set of comments (email titled EPA Comments on WVDEP MSGP) that we provided and the documents that those comments were based on (included in the email that has the following in titleConnie 5-1-20)

While we have a 90 day review, I am hopeful that there are minor changes (an WVDEP has maintained what we believe is the correct version control) in this draft and that this draft is not wholly different then what EPA commented on and was provided to EPA on 5/4.

Shana, feel free to take a look at the documents and try to do a compare.

Liz is off the remainder of the week and I didn't want to hold off on any progress since we have a number of permits in the queue.

Michelle Price-Fay, Chief
Clean Water Branch
Water Division (3WD40)
